Experience

- Software Engineer, Armada.ai** 08-2025 – Present | Trivandrum
- Contributed to a multi-tenant IaaS/PaaS platform for edge datacenters, building frontend workflows for VM provisioning, cluster creation, resource allocation, and AI model deployment/inference using React, Vite, and MUI.
 - Developed a production-grade Go backend service powering an internal analytics platform used by 80+ employees and leadership teams.
 - Built an end-to-end support ticketing system within Bridge, implementing role-based access control (RBAC) and workflows for ticket creation, management, assignment, and resolution.
 - Built AI-powered quarterly GitHub reporting workflows using Gemini and multi-agent architecture to generate engineering insights from pull requests, commits, contributor activity, and sprint trends.
 - Developed an AI-powered Datadog chatbot with custom tool integrations and streaming responses, enabling PMs and leadership teams to retrieve product and user-behavior insights conversationally.
 - Built CI/CD pipelines for Go services using GitHub Actions and deployed them to Azure Kubernetes Service (AKS), integrating Azure Managed Identity and Azure Key Vault for secure cloud operations.
 - Built and maintained a reusable component library using React, TypeScript, Vite, Storybook, and MUI, improving UI consistency across multiple products while implementing WCAG 2.0 Level A & AA accessibility standards.
- Full Stack - Intern, Frinks.ai** 01-2025 – 03-2025 | Bangalore, India
- Contributed to the development of an ERP platform supporting role-based access control and dynamic multi-level user workflows.
 - Implemented scalable frontend and backend features to improve secure user management and operational workflows
- Front-End Developer Intern, Oronium** 04-2024 – 12-2024 | Trivandrum, India
- Developed responsive and reusable UI components using React, Tailwind CSS, and Next.js.
 - Collaborated on translating design prototypes into production-ready frontend experiences.

Technical Skills

Languages: Go (Golang), JavaScript, TypeScript, SQL, Python, C++
Frontend: NextJs, Reactjs, Vite, Redux, Nodejs, Tailwind CSS, Git, RESTful APIs, Material UI (MUI)
Backend : Go, Node.js, Express, REST APIs, Microservices,
Cloud & DevOps: Docker, Kubernetes, GitHub Actions, CI/CD, Docker, Azure Kubernetes Service (AKS)
AI: Agent Development Kit (ADK), AI agents, Claude
Developer Tools: PostgreSQL, Postman, Git

PROJECTS

- Project Management System**
- Developed a full-stack project management tool with project status, task assignment, multiple project views (List, Board, Timeline, Table), and search functionality.
 - Built a responsive frontend using Next.js, Redux Toolkit, and MUI, with dynamic state management and modern UI components.
 - Designed and implemented a scalable backend with Express and Prisma ORM, including RESTful APIs, PostgreSQL integration, and schema migrations.
- OpenLidarX, LiDAR point cloud processing software**
- Developed a desktop toolkit for LiDAR point cloud processing with ground filtering, denoising, and surface reconstruction.
 - Integrated real-time point-cloud visualization using Open3D and PyVista; enabled mesh editing and measurement tools.
 - Implemented a modular GUI with PyQt5 for streamlined workflow, including point selection, downsampling controls, and real-time reconstruction preview

Education

BTech,Computer Science and Engineering, College of Engineering Trivandrum 06-2021 – 04-2025 | Kerala
CGPA : 7.89

ACHIEVEMENTS

- First Prize** , Hack@Arch 2.0 2023
- National level hackathon conducted by Tinkerhub GECT and IEEE SB GEC Thrissur . Our team got the first prize from more than 700 registered teams.

Leadership/Extracurricular

- Project Convenor, Drishti 2024** 04-2024 – 04-2024
- Managed a team of 8 members to organize a project expo featuring 40+ projects.
- Volunteer Secretary, NSS CET (2023 – 2024)** 11-2023 – 12-2024
- Led and coordinated 200+ volunteers across community service initiatives.
